

ARYA UNNI

Niagara Falls, ON, Canada | +1 519 731 2967 | aryaunni.tkm@gmail.com
linkedin.com/in/arya-unni-191a85225 | github.com/AryaUnni2000

PROFESSIONAL SUMMARY

Data Analyst and Software Developer with a Bachelor of Technology in Computer Science and an advanced Master of Data Analytics. Skilled in Python, SQL, Power BI, Tableau, and predictive modeling. Experienced in building end-to-end multi-source data pipelines, developing full-stack web applications, conducting exploratory data analysis, and delivering actionable business intelligence to stakeholders.

TECHNICAL SKILLS

Programming & Scripting	Python (Pandas, NumPy, Matplotlib), SQL (PostgreSQL, MySQL), R, C, C++, HTML, CSS
Data Analytics & BI	Power BI, Tableau, Databricks, Exploratory Data Analysis (EDA), Machine Learning (CNNs)
Data Engineering & ETL	Multi-Source ETL Data Pipelines, Data Cleaning, Data Preprocessing
Frameworks & Tools	Django, Git, GitHub, MS Excel (Advanced Pivot Tables, VLOOKUP), Jupyter Notebooks, Jira, Taiga
Agile Management	Taiga (Profile: @aryaunni2000 Project: @aryaunnitkm), Agile Frameworks

SELECTED ACADEMIC / CAPSTONE PROJECTS

AI-Powered Career & Skill-Gap Recommendation System

Apr 2025 – Sep 2026

Master's Capstone Project

- Engineered an automated ETL data pipeline integrating multi-source datasets (Canadian Job Bank, O*NET, and CIP educational pathways) using Python and SQL.
- Developed skill-gap analysis algorithms mapping user skill profiles against real-time Canadian labor market demands to generate dynamic career recommendations.
- Visualized labor market trends and skill demand distributions using interactive Power BI dashboards to optimize career trajectory metrics.

Object Detection & Image Localization using CNN

Jan 2023 – May 2023

Undergraduate Main Project

- Trained and evaluated a Computer Vision model using Convolutional Neural Networks (CNNs) in Python to detect and classify objects in complex image datasets.
- Applied data preprocessing, feature extraction, and rectangular bounding box generation for precise spatial localization.

Online Public Distribution & Inventory System

Aug 2022 – Dec 2022

Academic Project

- Developed a web-based database management system using Python and SQL to digitize retail shop ordering and inventory tracking.
- Integrated dynamic transaction handling, backend data validation checks, and customer order confirmation workflows.

PROFESSIONAL EXPERIENCE

Python & Django Developer Intern

Sep 2023 – Apr 2024

Luminar Technolab

- Architected full-stack web applications using Python and Django, managing backend database schemas, routing, and controller integration.
- Designed relational database structures with SQL, executing optimized backend queries to enhance data retrieval speeds.
- Collaborated within an agile team adhering to clean code principles, version control (Git and GitHub), and automated unit testing.

EDUCATION

Master of Data Analytics <i>University of Niagara Falls, Niagara Falls, ON</i>	Apr 2025 – Sep 2026
Bachelor of Technology in Computer Science & Engineering <i>APJ Abdul Kalam Technological University, Kerala, India</i>	Jun 2019 – Jun 2023

CERTIFICATIONS & SPECIALIZED TRAINING

- **Cloud Computing Training:** PaceLab (Hands-on training in cloud infrastructure and deployment models)
- **Google Digital Unlocked:** Fundamentals of Digital Marketing
- **NPTEL Online Certification:** IIT/NPTEL (Advanced technical coursework evaluation)
- **Data Analytics Workshops:** R Programming & ADAS Workshops

ACHIEVEMENTS & EXTRACURRICULARS

- Successfully developed and deployed an end-to-end AI career recommendation pipeline for Canadian market analytics.
- Active contributor on GitHub with analytical projects and project lead on Taiga managing agile development workflows.
